

City of Fort Smith Water, Sewer, and Sanitation

The City of Fort Smith Water and Sewer Rates are calculated using a base fee for meter and service availability and the volume of water used and sewer discharged.

The Monthly Water Base Fee is determined by the size of water meter installed at the premises. Most residence have a 5/8" or 3/4" meter and the monthly base fee for that size of meter is \$4.97.

The Monthly Sewer Base Fee is set at \$4.50.

Winter Averaging: During the winter months (November to March) the volume of sewer billed is based on the amount of water used during that time. During the summer months (April to October) the volume of sewer billed is based on either the average monthly water usage during the winter months (November to March) or the actual water usage if that volume is lower than the average.
