

## Utility Friendly Tree List

The utility friendly tree list below was developed from the City of Fort Smith approved tree list. Trees in the list below may be placed in a Utility Easement upon written approval. Trees that are considered utility friendly have a slow-growing root system and are not as prone to damaging underground utilities. No tree which is within an easement or right of way shall be planted closer than 10 feet to a public water or sewer line. Trees that are not listed may be approved by written notice. The utility department reserves the right to trim or remove any obstructions within a utility easement. Replacement of any trees or shrubs located within a utility easement or right of way will be at the owner's expense.

### Utility Friendly Trees

1. **Crab apple** Malus spp.
